
Description Anti-Fingerprint coating for stainless steel sheets, coloured, uncoloured, pattern-rolled, patterned from Steel Color

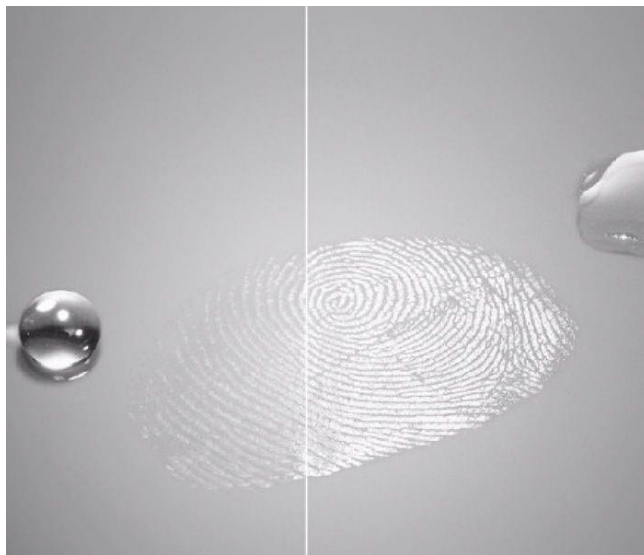

Anti-Fingerprint (AFP)

The surfaces treated with the special Anti-Fingerprint coating (AFP) retain their aesthetic and mechanical properties. This reduces fingerprints, provides an "easy to clean" finish and makes it easier to remove dirt.

A thin layer of a perfectly transparent paint is applied to the sheets. This paint adheres strongly to the surface and enables various finishing methods, such as shearing, laser cutting (with both fibre and CO₂ lasers), stamping (without oil), and bending.

The applied paint has the following properties:

- Resistance to household cleaners
- Safe for contact with food and organic acids
- Does not contain any heavy metals
- Is easy to clean
- Sheets with the Anti-Fingerprint coating should be cleaned, like conventional stainless steel sheets, with only a soft cloth and neutral soap.

Available finishes

The Anti-Fingerprint coating can be applied to the following finishes:

- Coloured surfaces using INCO and PVD processes:
Satinato (grinded), Pallinato (glass-bead blasted), Scotch Brite (SB), Hairline (HL)
- Pattern-rolled and patterned finishes:
Lino (linen), Quadro (square), Dots (dots), Pelle (leather), Stof
- Uncoloured surfaces:
Satinato (grinded), Pallinato (glass-bead blasted), Hairline, Scotch Brite

Please note that this treatment is currently not available for 2WL, 5WL, 6WL, STRIPES, BRONZO SATINATO INC. and mirror-polished finishes (SUPER MIRROR No. 8 / LUCIDO 7). However, Steel Color is continuously developing new finishes and is happy to assess demand for the above-mentioned finishes upon specific request.

Formats and grades

The AFP coating can be applied to the finishes listed above. The dimensions and alloys depend on the chosen finish and cover the full range of dimensions and alloys.

- Formats from 1000 x 2000 mm to 1500 x 4000 mm
- Thickness: 0.60 mm – 3.00 mm
- WN 1.4307, 1.4404 and 1.4509

All options can be found on our homepage: [Decorative sheets Steel Color with AFP](#)

Cleaning

Sheets with the Anti-Fingerprint coating should be cleaned with only a soft cloth and neutral soap.

Quality assurance

Surface testing is performed according to the highest quality management standards (UNI EN ISO 9001), ensuring the durability of our products.
